CDF ONLINE LIMITS

CDF Online is the safest and most secure means of making payments and paying bills. In fact, since CDF Online became available to our clients, there has never been a reported case of fraudulent access or activity by way of CDF Online. One of the means we use to keep CDF Online safe and secure is the sensible choice and application of transaction limits. These limits should be considered carefully when completing or updating the CDF Account

Authority forms located on our website. The applied limits have two main purposes, namely;

1. To allow without restriction, all legitimate transactions to be carried out online, without the need for writing cheques; and,

2. To place reasonable limits to moderate risk to the account should unauthorised
access to CDF Online occur.

There are two types of CDF Online limits that are applicable to 'Full Access' users of CDF Online.

1. Authorisation Limit. This limit is applied to each CDF Online 'Full Access' user and restricts the maximum amount of each single transaction or total of batch payment amount, that a 'Full Access' user can authorise in any given transaction.

2. Daily Account Limit. This limit applies to each account and restricts the maximum aggregate amount per business day that may be debited from that account and paid to external bank accounts (EFT) and/or Bpay Bill payments. It should be noted that this limit does not apply to transfers between internal accounts or transfers to other CDF client accounts.

For example, a CDF Online user with a $5,000 authorisation limit could not pay a single Bpay Bill or EFT payment for $6,000 even if the Daily Account Limit on the account was $10,000.

However that user could make eg. 5 x $2,000 Bpay Bill payments or EFT payments within a single business day as each transaction is less than $5,000 and the aggregate does not exceed $10,000

As always, if you are unsure about any CDF Online limits always call us at the CDF on

Ph. 93905200 or enquiries@sydneycdf.org.au

THE NBN AND EFTPOS

Is the NBN rollout coming your way? Do you currently have an Eftpos machine that relies on a fixed telephone line that will soon be redundant? It is time you upgraded to a mobile Albert* terminal:

Albert* works on the 3G network or on WiFi much like a mobile phone and comes with its own Telstra SIM card. Contact us at the CDF to find out how you can apply or upgrade.

BPOINT* SECURITY

From the 22nd April 2018, CBA are significantly increasing the security layers supporting its Bpoint* service. If you are using Bpoint* you may be contacted by Bpoint* Support in this regard. What do you need to do? To ensure that you will continue to be able to access Bpoint* after 22nd April 2018 on your computer, simply ensure that you are using the latest browser version available. You may use Internet Explorer, Google Chrome, Firefox or Safari to access Bpoint* but you must have upgraded to the latest version of your preferred browser. If you are using the following versions or lower, you will need to upgrade:

Internet Explorer	V10 and below
Google Chrome	V32 and below
Firefox	V33 and below
Safari	V7 and below

DID YOU KNOW?

- The CDF's 2017 Annual Report is available on our website www.sydneycdf.org.au
- The CDF distributed $13.8 million dollars to the Archdiocese of Sydney and Parishes last financial year.
- QuickCash* deposit bags are provided free of charge to CDF clients by the CBA. Please contact us to arrange delivery.
